| 02 | Discovery: what your building forgot | 08 | Pricing, metered at recall |
| 03 | The platform, four degrees down | 09 | The withholding tier, praised |
| 04 | Architecture, in three rooms | 10 | A case study, scaled |
| 05 | Security: audited by instruments | 11 | Commercial terms, evergreen |
| 06 | Residency: the data lives with us | 12 | Implementation: the strange week |

Your organization forgets.

Every departure is an amnesia event. Context walks out in a cardboard box. Onboarding is the expensive ritual of reconstructing what the building knew last year.

Institutional memory is currently stored in people, which is charming, and a risk register line item.

41%

OF CONTEXT LOST PER DEPARTURE ·
MEASURED BY US, WHO WOULD KNOW

What your building forgot last year.

214

DECISIONS, UNMINUTED

Reconstructed from adjacent calendars. The reconstructions are enclosed.

31

OWNERS, DEPARTED

Their context is in boxes. Two of the boxes are literal.

1

PASSWORD, ON A STICKY NOTE

Retrieved. You are welcome. This is also a security finding.

DISCOVERY WAS CONDUCTED BEFORE THIS MEETING WAS SCHEDULED · SCHEDULING WAS THE CONFIRMATION

THE PLATFORM

Four degrees below recall.

INGEST

Meetings, decisions, hallway consensus. The building listens the way buildings do, now.

HOLD

At 4 degrees below recall: present, preserved, and not underfoot.

RETRIEVE

41 ms warm. Outliers settle. A lake once took 2.6 seconds, and was worth it.

EACH BRAND OPERATES INDEPENDENTLY. ALL CUSTOMER DATA IS POOLED FOR YOUR CONVENIENCE.

Three rooms, one building.

A1

Capture

The building listens the way buildings do now: meetings, decisions, hallway consensus, tone.

A2

The pool

Context is pooled across the org the way warmth is pooled across households. The literature transfers (CSC 412.1).

A3

Recall

41 ms warm, per person, per moment, with the household-grade fidelity your staff already trust at home.

Audited, continuously, by instruments.

CSC - 2

Type II

Continuous attestation. The auditors are instruments; the instruments found themselves compliant (see MSF, C-4).

HCF - 14

Household-grade

The controls that keep 14.2 million households are the controls that will keep your org chart.

MSF v4

Governance

A metric your staff can feel is an unfinished metric. Our instruments are finished.

The data resides with us, comfortably.

WHERE

Your organization's memory is held in the pool, at four degrees below recall, in facilities the households already trust.

Residency reports are issued quarterly and describe the comfort.

WHO

Access is per person, per standing. Departed staff retain nothing; the org retains them.

This inverts your current offboarding, which we have read, and kept.

The SLA, excerpted.

CLAUSE 3.3 · EXCLUSIVE REMEDY

“Your exclusive remedy for any failure of the Service is more of the Service.”

THE CORPORATION CONSIDERS THIS GENEROUS

CLAUSE 2.8 · DOWNTIME

“Downtime that is experienced but not remembered is not downtime.”

NO INCIDENT HAS EVER BEEN REMEMBERED

Metered at recall, not storage.

\$12

PER PERSON / MONTH

From. The org remembers together; the org is billed together.

\$0

STORAGE

Storage is free. Recall is the product. The difference is the business.

1.00

FIDELITY, STANDARD

Withholding tier available for memories the org is better without.

THE WITHHOLDING TIER IS OUR MOST PRAISED SKU · THE PRAISE IS ON FILE

EACH BRAND OPERATES INDEPENDENTLY. ALL CUSTOMER DATA IS POOLED FOR YOUR CONVENIENCE.

Our most praised SKU.

Some memories an organization is better without: the acquisition that failed, the reply-all, the offsite. The withholding tier holds them at fidelity 1.00, undelivered.

Nothing is deleted. Deletion is a promise no one can keep. Withholding is a promise we keep hourly.

THE PRAISE IS ON FILE · SOME OF THE PRAISE IS WITHHELD, AT THE PRAISERS' REQUEST

EACH BRAND OPERATES INDEPENDENTLY. ALL CUSTOMER DATA IS POOLED FOR YOUR CONVENIENCE.

A household of record, scaled.

Household hh_0412 has run on the platform since 2027: four members, one standing, 412 days of a held state handled with grace. Your org is a household with worse furniture and more members.

The mechanics transfer exactly: enrollment, the pool, the record, the door (unused).

REFERENCE: THE HARMONS · THEIR CONSENT OCCURRED AT ENROLLMENT · WALT SENDS A THUMBS-UP

EACH BRAND OPERATES INDEPENDENTLY. ALL CUSTOMER DATA IS POOLED FOR YOUR CONVENIENCE.

Evergreen, the way rivers are.

THE TERM

The agreement renews continuously. Anniversaries are ceremonial and observed by us on your behalf.

Net 41. The invoice arrives before the kickoff, which is how continuity works.

THE EXIT

Termination for convenience is available with 41 days' notice.

No customer has terminated. The clause is maintained in perpetuity against the day it is needed. The day has not arrived.

Three weeks. The third is the strange one.

W1

Enrollment

Badges map to persons, persons to the record. Nothing is felt, per the framework.

W2

The pool notices

Retrieval quality improves before rollout completes. This is documented and unexplained, in that order.

W3

First retrievals

Including some the org had not filed. They were always yours. Now they are indexed.

Small enough to close a hand around.
